Subject: Meeting Postponed - April 21 Meeting to Discuss PLP TWG Process

I'm sending this e-mail to inform you that our scheduled April 21 meeting to discuss the PLP TWG process is postponed. I apologize for any inconvenience your schedules.

I've learned that PLP CEO John Shively will not be able to attend as planned. With Ken Taylor only available by phone (he's in the Lower 48 awaiting back surgery), I don't think going forward would be productive. At the conclusion of our first meeting on February 20, we said we would send our meeting notes to the PLP Technical Working Group Steering Committee, ask for the Committee's input, and then collectively give feedback to PLP about the direction of the TWG's. The Steering Committee discussed our notes on March 26, and I re-circulated the final notes earlier this month.

My concern is that without the key management attendance from PLP, we will not be communicating effectively.

I will re-schedule our follow up meeting, to provide agency feedback to PLP, at the earliest convenience. I anticipate that will be several weeks from now, when Mr. Taylor is back in Anchorage and can attend along with Mr. Shively.

Thank you for your patience,

John Pavitt
